EXPERIENCE

Pharamaceutical Donation via Technology   2022 - 2023
Final Year Project

PharmaLink: Pharmaceutical companies often accumulate surplus medicine samples in warehouses, limiting patient access. PharmaLink addresses this issue with a web-based platform to facilitate the redistribution of surplus medicines, enhancing patient access and benefit.

Freelencing Projects   2020 - 2022

Delivered multiple React-based projects on different freelancing platforms, demonstrating my expertise in creating responsive and high-quality websites. These projects underscore my ability to meet client needs and adhere to deadlines effectively.

- Admin Dashborad Application
- E-Tech Store Application
- Text Analyzer Application
- Currency Converter Website
- I have developed various strategy games, focusing on creating engaging user experiences and robust functionality.
